Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 269 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 269 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a fax received from attorney Harry B. Shubin on date July 31, 2008.

IN THE SPECIFICATION

After the paragraph beginning at line 29, page 4, and ending at line 31, page 4, please insert the following:

Brief Description of Drawings

Figure 1 represents differential thermal analysis of a compound of formula I in which n is 1 and R is methoxy.

Figure 2 represents an IR adsorption spectrum of the compound of Figure 1.

Figure 3 represents an X-ray diffraction spectrum of the compound of Figure 1.

Figure 4 represents differential thermal analysis of a compound produced in comparative example 1.

Figure 5 represents an IR spectrum of the comparative compound of Figure 4.

Figure 6 represents an X-ray diffraction spectrum of the comparative compound of Figure 4.

Allowable Subject Matter

Claims 1 and 3-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The rejection of claims 3-12, and 15 under 35 U.S.C. 112, second in the previous Office action is withdrawn due to Applicant's argument in Brief on Appeal dated on 05/12/2008. Applicant's argued that a "salt" must not necessary be a dry product, such an assumption is unsupported in chemistry. It is well known that salts of carboxylic acids can exist dissolved or suspended in solution. For example, see the attached portion of an introductory college organic chemistry text, noting that carboxylic salts can be dissolved. Moreover, step (b) of the claim recites acidifying an aqueous solution of the salt obtained after step (a). Thus, it is clear that the claim encompasses the "steps" of forming a salt and acidifying an aqueous solution of the salt product produced on (a). Moreover, it is submitted that "forming a carboxylic acid salt", for example, by adding hydroxide ions to the corresponding acid as detailed in the attached organic chemistry text, is manifestly well known to those of skill in the art.

The rejection of claims 13 and 14 under 35 U.S.C. 102(b) over Brunet et al., WO 00/39113 in the previous office action is withdrawn due to Applicant's argument in Brief on Appeal dated on 05/12/2008. Applicants argue that such a metastable form is not disclosed in the commonly assigned reference, as clearly evidenced by the allowance of

claim 1 reciting such form. For example, at page 7 of the present specification, solid formations which are "pharmaceutical compositions" of a metastable compound of formula I are disclosed, including tablets and granules. Moreover, the paragraph bridging pages 7 and 8 discloses a solid composition for oral administration. Example 3 of the specification, at page 13, discloses advantages of the metastable form of the compound of the invention, where that metastable form is prepared as a powder suitable for grinding or micronization.

Any comments considered necessary by applicant must be submitted no late than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niloofar Rahmani whose telephone number is 571-272-4329. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres, can be reached on 571-272-0867. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
